

Investment Update for the Generate KiwiSaver Scheme Stepping Stones A applies to: Stepping Stones 0-35 years old investment option

31 March 2018

This fund update was first made publicly available on 1 May 2018.

What is the purpose of this update?

This document tells you how the Stepping Stones A investment option has performed and what fees were charged. The document will help you to compare the investment option with other investment options and funds. Generate Investment Management Ltd prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this investment option

The objective of the Stepping Stones A investment option is to provide a growth investment return over the long-term through investment in a portfolio of actively managed cash, fixed interest, property (including aged care) and infrastructure assets¹, and International equities². The investment option has a medium level of volatility.

Stepping Stones 0-35

Total value of the investment option	\$18,587,121
Number of investors in the investment option	2,687
The date the investment option started	16 April 2013

What are the risks of investing?

Risk indicator for Stepping Stones A:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the investment option's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://www.generatekiwisaver.co.nz/survey>. Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of an investment option's future performance. The risk indicator is based on the returns data for the last five years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future investment updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this investment option.

How has the investment option performed?

	Past year
Annual return (after deductions for charges and tax)	12.08%
Annual return (after deductions for charges but before tax)	13.48%
Market index annual return (reflects no deduction for charges and tax)	11.90%

The market index return reflects a composite of benchmark index returns, weighted for the investment option's target asset allocation. The benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO).

Additional information about the market index is available in the SIPO on the register at business.govt.nz/disclose.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the investment option started. The last bar shows the average annual return since the investment option started, up to 31 March 2018.

Important: This does not tell you how the investment option will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Stepping Stones A investment option are charged fund charges. In the year to 31 March 2018 these were:

	% of net asset value
Total fund charges	1.76%
Which are made up of:	
Total management and administration charges including:	
Manager's basic fee	1.00%
Other management and administration charges ⁴	0.76%
Total performance based fees	0.00%
Other charges	\$ amount per investor
Membership Fee ⁵	\$36.00 per year

A portion of the 'other management and administration charges' relate to management, performance and administration charges from investments in underlying funds. Some of these calculations are based on estimates.

Investors are not currently charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for more information about fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

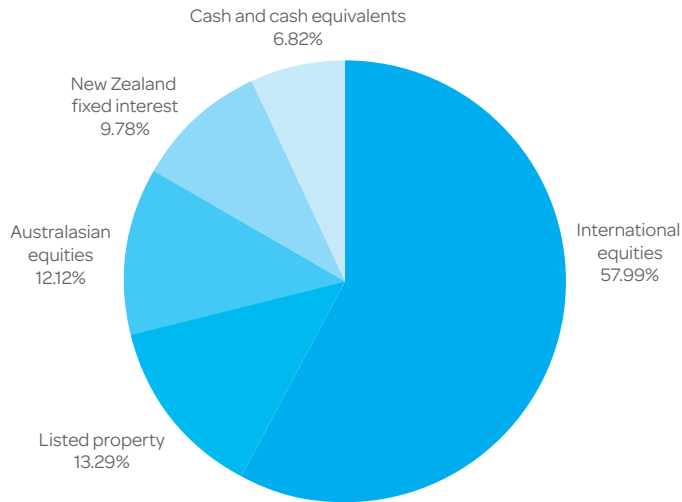

Example of how this applies to an investor

Hannah had \$10,000 in the investment option at the start of the year and did not make any further contributions. At the end of the year, Hannah received a return after fund charges were deducted of \$1,208 (that is 12.08% of her initial \$10,000). Hannah also paid \$36 in other charges. This gives Hannah a total return after tax of \$1,172 for the year.

What does the investment option invest in?

This shows the types of assets that the investment option invests in^{1,2,6,7}.

Actual investment mix

Target investment mix

This shows the mix of assets that the investment option generally intends to invest in.

Top 10 investments

Name	Percentage of investment option net assets	Type	Country	Credit rating (if applicable)
Platinum International Fund	8.34%	Diversified fund	Australia	
T Rowe Price Global Equity Fund	8.19%	Diversified fund	Australia	
Berkshire Hathaway	8.13%	International equities	U.S.A.	
Magellan Global Fund	7.42%	Diversified fund	Australia	
Infratil	5.49%	Australasian equities	New Zealand	
BNP Paribas On Call Cash Account	4.33%	Cash and cash equivalents	U.S.A.	
Worldwide Healthcare Trust	4.17%	Diversified fund	United Kingdom	
Jupiter European Opportunities Trust	4.12%	Diversified fund	United Kingdom	
Polar Capital Technology Trust	3.86%	Diversified fund	United Kingdom	
ASB On Call Cash Account	3.82%	Cash and cash equivalents	New Zealand	

The top 10 investments make up 57.87% of the investment option.

The Stepping Stones A investment option has substantial offshore investments. The long-term foreign exchange hedging target is 50%. Where the Investment Executive believes a relevant currency is over or undervalued it can request the Investment Committee's permission to alter the hedging percentage. Unanimous approval is required for the hedging target to be modified.

Key personnel

This shows the directors and employees who have the most influence on the investment decisions of the fund.

Further information

You can also obtain this information, the PDS for the Generate KiwiSaver Scheme, and some additional information from the offer register at business.govt.nz/disclose.

Notes

1. The Manager takes a broad view of what constitutes infrastructure assets. See the SIPO for further information.
2. International equities are primarily investments in underlying funds but also include an investment in Berkshire Hathaway Inc. and investments in up to six other large capitalisation international stocks.
3. Market index returns as well as the investment option's actual returns have been used to calculate the risk indicator. Market index returns were used for the data prior to the investment option's inception on 16 April 2013 as they are a good proxy for the fund's actual returns. As a result of these returns being used, the risk indicator may provide a less reliable indicator of the potential future volatility of the investment option.
4. For some of the underlying funds that the investment option invests into estimates were used when deriving annual management fees, performance-based fees and operating costs. The management fee estimate is calculated by either (i) the annual management fees as a percentage of average NAV from the most recent period whereby the information is available or (ii) the sum of the investment option's monthly average investments in the underlying funds concerned, multiplied by the underlying funds' percentage annual management fees. Where otherwise not available the performance fees were calculated using the same performance criteria as that stated by the administrators of the underlying funds and applied to FY18 performance. Performance-based fees are subject to market movements and external manager performance and therefore are likely to differ from period to period. The operating costs for the relevant period for some of the underlying funds were not available. In these instances the operating costs estimate is calculated by either (i) the operating costs as a percentage of average NAV from the most recent period whereby the information is available or (ii) the estimate is the sum of the investment option's monthly average investments in the underlying funds concerned, multiplied by the underlying funds' percentage annual operating costs.
5. Membership fees are the monthly fixed dollar charges for membership in the Generate KiwiSaver Scheme. You will pay only \$3 each month even if you are invested in multiple funds within the Generate KiwiSaver Scheme.
6. 'Cash and cash equivalents' includes the value of foreign exchange hedging derivatives related to the investment option's off-shore investments.
7. Listed property includes investments in aged care companies.
